

Developer of iOS Ambient App TaoMix Launches Halloween Edition

New iOS App to Create the Perfect Ambience for Halloween.

MONTREAL, CANADA – October 19, 2016 – Available today for iPhone and iPad, TaoMix Halloween makes it easy for anyone to add a spooky ambience to their home or party for the next Halloween.

The TaoMix Halloween app offers a collection of high-quality sounds that users can choose to include in their ambience. The app will evolve over time by continuously adding and removing these sounds, changing the mix and generating random spine-chilling events depending on the selected scariness level.

While being easy to use and intuitive, the TaoMix Halloween app offers great possibilities by letting users record and modify their own sounds to extend the included library.

Key features of the app:

- Easy to use, minimalist and intuitive.
- Select high quality sounds to be included in your mix, and watch it evolve over time!
- Control the level of scariness of your ambience.
- Record your own sounds and apply filters.
- Mix with other audio apps.
- Let yourself be surprised with spine-chilling random events!

Availability

TaoMix Halloween is available today on the App Store for \$1.99 USD. TaoMix Halloween is compatible with all iOS devices running iOS 9.0 and later.
